- RLG Valueaddlist Project : Working on this project to enhance the UI and add features based on requiremnets using react.
- Flexi Work Pattern app : Developing app to help team for getting Number of employees wish to WFH or WFO using Angular.

SKILLS

C++

SQL

PL/SQL

Data Structures

C#

ASP .Net

Angular

Web Api

Machine Learning

Azure

Javascript

Nunit

React.Js

Entity framework

Microservice architecture

ADO .NET

RESTful Api

Python

PROJECTS

Kshathi (12/2022 - 01/2023)

- This Web App helps dairy staff to manage collection of milk from farmer & other dairy and sales of dairy products .
- This helps in maintaining a record of all farmers regular entries .
- To develop this webapp I used .Net Fullstack Framework with Angular for Frontend.

Credit Card Fraud Detection using ML. (10/2021 - 12/2021)

- We trained model using SVM, logistic and linear regression . To find out the best algorithm for this problem.
- Where we can enter the credit card transaction details , the model predict its fraud or not.

CERTIFICATES

Microsoft Certified: Azure Fundamentals

MICROSOFT

Problem Solving through programming in C
